
Bus-booking platform
Three Main Tasks:
Order Dispatching
Assign orders to buses (matching and separating)
Route Planning
Plan routes for each bus (computing cycles)
Order Pricing
Determine price of order (pricing and selecting)
Joint Dispatching, Routing and Pricing
Provide seats
Submit orders
Solution at time slot t
Destination not passed by
d_5
Bus b_2
d_1
Bus b_1
d_2
$r_2 = [d_5, d_6, d_7]$
Route $r_1 = [d_1, d_2, d_3, d_4]$
d_6
d_7
Price of order $p_7^t = 10$
d_4
Destination of order d_3
